Areas of collaboration

2.1 Classroom session

- Guest lecture by the doctors, clinical research and management team of Pi Health, on an ad-hoc basis, per the availability of experts at Pi Health and at the sole discretion of Pi Health.
- Technical content support for the program by MRU.

2.2 E-Learning Program

Clinical Research and Experimental Medicine students shall participate in the short-term e-learning program which will be provided by MRU. After the successful completion of the program, students will be rewarded by MRU with the E- certificate of completion. Please note that MRU shall be responsible for formulating, finalizing and providing the e-learning program to the students. Pi Health's responsibility shall be limited to providing a topic specific guest lecture only.

2.3 Internship

Pi Health will offer internship of 3 (three) months, at the hospitals operated by Pi Health, to each selected student from among the students who are enrolled in the Program. Pi Health will select the students for internship basis its own selection criteria.

2.4 Campus Recruitment
